## Admission Essay

The goals and experience of an individual assist him in becoming more aware and conscious regarding what he wants to achieve in his future. The individual tries to strengthen his confidence and motivation for the purpose of fulfilling the goals and aims that he has set for himself. I, too have certain goals and ambitions in my life. One of the main and the most important goal of my life is to help others. I have always tried to help others in whatever way I can as I always feel content when I am helping others. Since childhood, I always tried my best to take care of my family members or my friends who fell ill. During my teenage, I used to spend most of my time taking care of my grandmother who was constantly ill due to old age. This urge of helping and taking care of the individuals instilled in me the interest of pursuing a career in medicine. I got more interested in this field as I started attaining education in medicine. Due to my high grades, I was able to score a position in a prestigious university and now after successfully graduating from the university, I am interested in further pursuing my education by applying for a doctoral program. My professional goals are to complete my doctoral program and further develop my career by researching and continuing to learn more and more.

Throughout my academic period, I actively participated in the extracurricular activities. In my high school, I also volunteered in the Big brother/ Big sister counseling and mentoring program which was initiated by our high school. I tried my best to effectively mentor the children to lead a better life. As a result in my college program, I not only performed well in my academics, but also received the award for performing best in my extra-curricular activities and non-academic activities. During my Master's degree, my professors recommended me to various different medical clinics for internship programs so that I can experience the professional and

practical work. Those experiences motivated me more to opt for the doctoral program so that I can extend my knowledge and information regarding my field.

The doctoral program offered by your university is an appropriate and effective program which will help me in attaining more professional knowledge and experience. Starting a doctoral education means that one enters a whole new world which is more professional and advanced. Most of the programs are usually based on theory by the program offered by your university includes practical work as well. This university provides the students with a chance of actually experiencing the world of medicine. They allow the students to put in to practice the theories and the concepts that they have learned in the lectures. This is an effective way of teaching the students so that they learn more through the practical work. As one have to apply the knowledge practically in the professional world, a doctoral student has to be attentive and should be able to perform the task in a proper manner. As you take this knowledge further and apply it in your career or teach that knowledge to others, as well. This is why a doctoral student has to be responsible in whatever he applies what he learns or teaches it to others.

This doctoral program will assist me in becoming more focused and the courses which are being offered in this program will allow me to learn a lot of different methods, and techniques to make my work easier and effective. Your university is amongst a few world class institutions and is reputed for its quality teaching standards and a relaxed environment for the doctoral students, including competitive and inspiring academic atmosphere, active and fruitful research, access to first-class facilities and close interaction between students and its distinguished faculty. It will certainly be a privilege. With this, I rest my case on you for hearing and to be ended up with favorable judgment.
